Programming Languages: C++, C#, C, Java, Python, Golang.

Design Tools: Adobe Photoshop, Illustrator

Tools & Platforms: GitHub, Docker

Office Suite: Word, Excel, PowerPoint

PROFILE

To leverage my expertise in software development, web technologies, and game design to contribute to innovative projects, enhance user experiences, and drive impactful solutions. I aim to work in a challenging environment that fosters continuous learning and professional growth, while utilizing my technical skills in programming, graphic design, and systems development to achieve organizational goals.

EXPERIENCES:

1. 3D Shot Game Development

Developed an interactive **3D Shot Game** using **Open Frameworks**, focusing on dynamic gameplay and intuitive controls in Visual Studio with C++.
<https://github.com/tonmoyislam250/3dshotgame>

2. Dockerfile Development and Containerization

Designed and implemented optimized **Dockerfiles** for containerizing applications, ensuring lightweight, portable, and scalable deployments, configured multi-stage builds to improve efficiency and reduce image size
<https://github.com/tonmoyislam250/Dockerfile-codes>

3. Backroom Game Development in Unity (C#)

Developed a Backroom Game in Unity using C#, focused on creating an immersive first-person experience in a surreal, eerie environment inspired by backrooms and endless mazes.
<https://github.com/tonmoyislam250/EscaperoomGame>

4. Simple one page website

Simple One page website called spark food dome which is about food.
<https://github.com/tonmoyislam250/spaproject>

5. A Django Cooking Blog website

<https://github.com/tonmoyislam250/Django-Blog>

6. A coffee ordering Service website for home delivery

<https://github.com/tonmoyislam250/Coffevel>
